## GREETINGS FROM THE CO-PRESIDENTS

*Dear colleagues!*

Congratulations on the opening of the 7th International Congress «Current Trends of Modern Cardio-Thoracic Surgery».

It has become a good tradition to meet in our delightful city on the banks of the Néva River to discuss multidisciplinary approaches to treatment of patient with cardio-thoracic diseases. In the course of these years, the Congress has become a bridge connecting the East and the West, cardio-vascular and thoracic surgeons, and the number of the delegates grows over the years. Every subsequent year we welcome more and more foreign guests and experts, the agenda is becoming more complex and more interesting.

This year we celebrate the 50th anniversary of 3 major events that changed the appearance of the modern cardiothoracic surgery: the Ross operation, successful heart transplantation, and the venous aorto-coronary bypass graft. Special sessions of our Congress will be dedicated to these events. As well, the session "Acute and Chronic Pulmonary Artery Thromboembolism" will be dedicated to 110th anniversary of Trendelenburg operation. As usual, the Congress will boast outstanding cultural program and sport competitions.

We wish all the delegates good health and hope that this Congress will become another step to strengthen professional and cultural links, will help to build trust between our professional communities and serve the benefit of our patients.
